Result: Pass

Duration: 1Hour 30Minutes

- 1) You are on anchorage One day to dry dock as C/E your action.
- 2) Vessel on dock now surveyor will come tomorrow you got permission to check what will you check (means looking for hull , rudder , propeller , all what you check on them.)
- 3) Bunker calculation Rotterdam to India.
Tank planning, why not mix
Sulphur content,
I told both s% and so2ppm/co2%ratio
- 4) Back to dock stern tube seal arrangement inspection, chrome liner wear told about repair, depending upon groove size because it is case harden will go for resurfacing else if construction has distance piece will remove so that change seal seating area.
- 5) Reaching in port prepare for boiler survey,
- 6) You told risk assessment and ptw where you found ptw on board
told about COSWP and company sms
- 7) Economizer safety valve set up I told not possible in port will do in sailing c/e authorized to do so not req surveyor.
- 8) you told sms how you prepare for audit/
I told will go through last audit report what all item last time check will prepare all of them and any observation NC or major NC last will confirm rectified,
What is NC, major NC, observation.
If an major NC what you do can you sail, no can't sail until dispensation certificate how you get
Told him about downgrade nc, adopt alternate major stated by class then get dispensation and sail.
- 9) What all certificate you check and there expiry, b/w initial and renewal
Annual intermediate for IOPP,
Wat about IOPP I told intial and renwal additional survey if any repair.
How you get
Iapp certificate,
Nox technical file.
