Class 1 Oral's Questions

Date: 11 June 2024

Examiner: Nick Philips

Candidate name: Mukund Dami

Duration: 1Hr 15 mins

Result: Pass

Surveyor appeared on the screen exactly on time (0900hrs UK time), all formalities took 15 minutes (That was morning wishes, room tour, he asked do you have water to drink, stationery, also he asked about I am not using any type of recording device, what type of internet I am using I said I am using WIFI and also using dongle for back up, verification of the passport, also he asked where are you located i said sir Im in the hotel room, PUNE he wanted listen more I also mentioned 60 nautical mile southwest from Mumbai, he also asked me my back ground where I had done my second engineer, how many month I am working as a second engineer and which type of engine I had done I said I am only working is the conventional engine have not yet done any electronic engine he said okay also said if you don't understand my question tell me I will ask you other way he said I will be recording our meeting If you have any issue i said its fine sir you maygo ahead and start recording,)

1. Which exam you are here for I said chief engineer certificate of competency STCW regulation III/2 he was not satisfied than I said unlimited still he wanted to listen some thing i was little confused but finally i said motor only than he was satisfied. So please speak full detail my first mistake.
2. How did you prepare your oral exam have you took any private tuition.
3. Handing over as a CE Started from shore but he said he want to listen near ship, so I started from near by ship when I will about to approach to ship it may be from boat and may be from the port I said I will first thing check smoke from funnel than I started other things. Routines in main switch board.also asked about checkpoint hot spot. BDN and FO analysis retort how will you know the fuel is complaint. All certificates.
4. Boiler water testing, chemicals used, why do we control oxygen what are other method than AMERZINE to control the oxygen tell me about the improved high lift safety valve.
5. He was in the depth of Air conditioning which type of refrigerant you was using your last vessel what do you want from your staff to do in AC how you will carry out routine in AC IF you have found leakage in AC what you will do all. ODP, GWP questions he also asked how you are going to calculate you ODP, GWP, entries in ozone record book.
